# AUTHOR INDEX

Abercrombie, L. W.
Microcellular Elastomers by Single-Stage Technology, p. 170
Allegra, G.
Chain Conformation and Crystal Structure of Stereoregular Polydienes, p. 64
Bailey, J. T.
Adhesive Applications of Kraton Polymers, p. 2
Bikerman, J. J.
Tack of Elastomers, p. 83
Blaich, C. F.
The Structure-Property Relationship of a New Series of Polyurethane Elastomers, p. 38
Roylar, A New Family of Thermoplastic Elastoplastics, p. 96
Bullman, A. R.
Plastisol Sealants for Automotive Applications, p. 256
Corradini, P.
Chain Conformation and Crystal Structure of Stereoregular Polydienes, p. 64
Economy, J.
Recent Advances in Development of High Performance Composites, p. 16
Elliott, E. C.
Designing with Fluorosilicone Materials, p. 161
Fischer, W. F.
Elastoplastic Composites in the Transportation Industry, p. 241
Fordyce, P.
The Economics of Concrete Pavement Jointing, p. 103
Frisch, H. L.
Dynamic Mechanical Properties of the Transcrystalline Regions in Two Polyolefins, p. 52
Fukuda, K.
Improvements in Urethane Sponge for Canvas Shoe Soles, p. 150
Gahagan, S. W.
Seamless Urethane Flooring, p. 60
Gahimer, F. H.
Hydrolytic Stability of Urethane and Polyacrylate Elastomers in Humid Environments, p. 266
Green, T. J., Jr.
Joint Sealants for Horizontal Pavement Joints—Specifically Bridge Joints, p. 143
Hoff, P.
The Use of Elastomeric Sealants in Concrete Paving, p. 117
Kwei, T. K.
Dynamic Mechanical Properties of the Transcrystalline Regions in Two Polyolefins, p. 52
Machek, A. L.
Silicones in the Automotive and Construction Equipment Industries, p. 213
Maier, J. E.
A Low Compression Set Fluoroelastomer for the Transportation Industry, p. 232
McKee, R. B., Jr.
A Statistical Model for the Tensile Fracture of Parallel Fiber Composites, p. 185
Murai, K.
Improvements in Urethane Sponge for Canvas Shoe Soles, p. 150
Nieske, F. W.
Hydrolytic Stability of Urethane and Polyacrylate Elastomers in Humid Environments, p. 266
Pachuta, J.
Development of an Effective Poured-in-Place Sealant for Concrete Joints, p. 89
Pearce, M. B., Jr.
Anaerobics—A New Approach to Gaskets, p. 124
Powers, A., Jr.
Metering High Viscosity Elastomers, p. 114
Reymore, H. E., Jr.
Microcellular Elastomers by Single-Stage Technology, p. 170
Ross, M. W.
Why Urethanes in the Transportation Industries, p. 251
Saaty, N. N.
Microcellular Elastomers by Single Stage Technology, p. 170
Sayigh, A. A. R.
Microcellular Elastomers by Single-Stage Technology, p. 170
Schonhorn, H.
Dynamic Mechanical Properties of the Transcrystalline Regions in Two Polyolefins, p. 52
Skeist, I.
Polymer Hybrids, p. 32
Smith, D.
Development of an Effective Poured-in-Place Sealant for Concrete Joints, p. 89
Stivers, D. A.
A Low Compression Set Fluoroelastomer for the Transportation Industry, p. 232
Thielker, E. E.
Engineering Properties of Viton Fluoroelastomer, p. 133
Wittemann, R. G.
Anaerobics—A New Approach to Gaskets, p. 124
Worley, A. A.
Elastoplastic Applications for Encapsulation of the Electrical and Electronic Devices, p. 200

# SUBJECT INDEX

Adhesion Promoters
Plastisol Sealants for Automotive Applications, p. 256
Adhesives, Contact
Adhesive Applications of Kraton Polymers, p. 2
Adhesives, Hot Melt
Adhesive Applications of Kraton Polymers, p. 2
Adhesives, Pressure Sensitive
Adhesive Applications of Kraton Polymers, p. 2
Aggregate Interlock
The Economics of Concrete Pavement Jointing, p. 103
Amine Curatives
The Structure-Property Relationship of a New Series of Polyurethane Elastomers, p. 38
Blends
Polymer Hybrids, p. 32
Block Polymers
Adhesive Applications of Kraton Polymers, p. 2
Bridge Joints
Joint Sealants for Horizontal Pavement Joints—Specifically Bridge Joints, p. 143
Canvas Shoe Soles
Improvements in Urethane Sponge for Canvas Shoe Soles, p. 150
Catalyst
Improvements in Urethane Sponge for Canvas Shoe Soles, p. 150
Cellular Polymers
Microcellular Elastomers by Single-Stage Technology, p. 170
Cement-treated Subbases
The Economics of Concrete Pavement Jointing, p. 103
Chemical Resistance
A Low Compression Set Fluoroelastomer for the Transportation Industry, p. 232
Coatings, 100% Solids
Seamless Urethane Flooring, p. 60
Composites
Recent Advances in Development of High Performance Composites, p. 16
Polymer Hybrids, p. 32
Compression Set
A Low Compression Set Fluoroelastomer for the Transportation Industry, p. 232
Cyclohexane Polymers
Chain Conformation and Crystal Structure of Stereoregular Polydienes, p. 64
Design

A Low Compression Set Fluoroelastomer for the Transportation Industry, p. 232
Fluorosilicone Rubber
Designing with Fluorosilicone Materials, p. 161
Silicones in the Automotive and Construction Equipment Industries, p. 213
Fracture, Tensile
A Statistical Model for the Tensile Fracture of Parallel Fiber Composites, p. 185
Gaskets
The Use of Elastomeric Sealants in Concrete Pavings, p. 117
Silicones in the Automotive and Construction Equipment Industries, p. 213
Glass Filaments
A Statistical Model for the Tensile Fracture of Parallel Fiber Composites, p. 185
Glycol Curatives
The Structure-Property Relationship of a New Series of Polyurethane Elastomers, p. 38
High-Temperature Rubbers
Designing with Fluorosilicone Materials, p. 161
Silicones in the Automotive and Construction Equipment Industries, p. 213
Highways
Development of an Effective Poured-In-Place Sealant for Concrete Joints, p. 89
Humidity
Hydrolytic Stability of Urethane and Polyacrylate Elastomers in Humid Environments, p. 266
Hydrolytic Stability
Hydrolytic Stability of Urethane and Polyacrylate Elastomers in Humid Environments, p. 266
Inductance Shift
Elastoplastic Applications for Encapsulation of the Electrical and Electronic Devices, p. 200
In-situ Molding
Improvements in Urethane Sponge for Canvas Shoe Soles, p. 150
Insulation
Elastoplastic Applications for Encapsulation of the Electrical and Electronic Devices, p. 200
Joint Design
The Economics of Concrete Pavement Jointing, p. 103
Joint Sealants
The Economics of Concrete Pavement Jointing, p. 103
Joint Support
The Economics of Concrete Pavement Jointing, p. 103
Kraton Polymers
Adhesive Applications of Kraton Polymers, p. 2
Liquid Methylenebis (phenyl isocyanate)
Microcellular Elastomers by Single-Stage Technology, p. 170
Liquid Prepolymer
Improvements in Urethane Sponge for Canvas Shoe Soles, p. 150
Load Bearing
The Structure-Property Relationship of a New Series of Polyurethane Elastomers, p. 38
Low-Temperature Rubbers
Designing with Fluorosilicone Materials, p. 161
Silicones in the Automotive and Construction Equipment Industries, p. 213
Metering
Metering High Viscosity Elastomers, p. 114
Mechanical Properties
Dynamic Mechanical Properties of the Transcrystalline Regions in Two Polyolefins, p. 52
Microcellular Elastomers by Single-Stage Technology, p. 170
Microcellular Foams
Elastoplastic Composites in the Transportation Industry, p. 241
Microcellular Urethane Elastomer
Improvements in Urethane Sponge for Canvas Shoe Soles, p. 150
Oil Resistant Rubbers
Silicones in the Automotive and Construction Equipment Industries, p. 213
O-Ring Seals
A Low Compression Set Fluoroelastomer for the Transportation Industry, p. 232
Plasticizers
Plastisol Sealants for Automotive Applications, p. 256
Plastics
Why Urethanes in the Transportation Industries, p. 251
Plastisols
Plastisol Sealants for Automotive Applications, p. 256
Polyacrylate
Hydrolytic Stability of Urethane and Polyacrylate Elastomers in Humid Environments, p. 266
Polyester Sealants
Anaerobics—A New Approach to Gaskets, p. 124
Polyesters
The Structure-Property Relationship of a New Series of Polyurethane Elastomers, p. 38
Polyether
The Structure-Property Relationship of a New Series of Polyurethane Elastomers, p. 38
Polyethylene Strips
The Economics of Concrete Pavement Jointing, p. 103
Polyolefin
Dynamic Mechanical Properties of the Transcrystalline Regions in Two Polyolefins, p. 52
Polymer Hybrids
Polymer Hybrids, p. 32
Polymers, Styrene Butadiene
Adhesive Applications of Kraton Polymers, p. 2

Polymers, Styrene Isoprene
Adhesive Applications of Kraton Polymers, p. 2
Polysulfide
Metering High Viscosity Elastomers, p. 114
Polyurethane
The Structure-Property Relationship of a New Series of Polyurethane Elastomers, p. 38
Seamless Urethane Flooring, p. 60
Roylar, A New Family of Thermoplastic Elastoplastics, p. 96
Elastoplastic Applications for Encapsulation of the Electrical and Electronic Devices, p. 200
Why Urethanes in the Transportation Industries, p. 251
Polyurethanes, Light-Stable
Seamless Urethane Flooring, p. 60
Prepolymers
The Structure-Property Relationship of a New Series of Polyurethane Elastomers, p. 38
Seamless Urethane Flooring, p. 60
Pumps
Metering High Viscosity Elastomers, p. 114
Reinforcement
A Statistical Model for the Tensile Fracture of Parallel Fiber Composites, p. 185
Resins
Plastisol Sealants for Automotive Applications, p. 256
Reversion
Hydrolytic Stability of Urethane and Polyacrylate Elastomers in Humid Environments, p. 266
Roylar
Roylar, A New Family of Thermoplastic Elastoplastics, p. 96
Sealants
Metering High Viscosity Elastomers, p. 114
Silicones in the Automotive and Construction Equipment Industries, p. 213
Sealants, Concrete Pavements
Development of an Effective Poured-in-Place Sealant for Concrete Joints, p. 89
The Economics of Concrete Pavement Jointing, p. 103
The Use of Elastomeric Sealants in Concrete Paving, p. 117
Joint Sealants for Horizontal Pavement Joints—Specifically Bridge Joints, p. 143
Sealants, High Temperature Structural
Plastisol Sealants for Automotive Applications, p. 256
Sealants, Low Temperature
Plastisol Sealants for Automotive Applications, p. 256
Seamless Flooring
Seamless Urethane Flooring, p. 60
Silastic
Elastoplastic Applications for Encapsulation of the Electrical and Electronic Devices, p. 200
Silicones
Designing with Fluorosilicone Materials, p. 161
Silicones in the Automotive and Construction Equipment Industries, p. 213
Solvent-Resistant Elastomers
Designing with Fluorosilicone Materials, p. 161
Statistical Model
A Statistical Model for the Tensile Fracture of Parallel Fiber Composites, p. 185
Stereoregular Polydienes
Chain Conformation and Crystal Structure of Stereoregular Polydienes, p. 64
Tack of Elastomers
Tack of Elastomers, p. 83
Thermal Stability
A Low Compression Set Fluoroelastomer for the Transportation Industry, p. 232
Thermoplastics
Roylar, A New Family of Thermoplastic Elastoplastics, p. 96
Tie Bars
The Economics of Concrete Pavement Jointing, p. 103
Torsional Modulus
Roylar, A New Family of Thermoplastic Elastoplastics, p. 96
Transcrystalline Region
Dynamic Mechanical Properties of the Transcrystalline Regions in Two Polyolefins, p. 52
Urethane
Hydrolytic Stability of Urethane and Polyacrylate Elastomers in Humid Environments, p. 266
Urethane Elastomers
Why Urethanes in the Transportation Industries, p. 251
Urethane Sealants
The Use of Elastomeric Sealants in Concrete Paving, p. 117
Joint Sealants for Horizontal Pavement Joints—Specifically Bridge Joints, p. 143
Vacuum Forming Elastoplastics
Elastoplastic Composites in the Transportation Industry, p. 241
Weather-Resistant Rubbers
Silicones in the Automotive and Construction Equipment Industries, p. 213
Whiskers
Recent Advances in Development of High Performance Composites, p. 16

---

Statement of Ownership, Management, and Circulation as of October 1, 1969, Journal of Elastoplastics, published quarterly with publication and business offices at 750 Summer Street, Stamford, Fairfield County, Conn. 06901

Publisher—Melvyn A. Kohudic, Stamford, Conn.
Editor—Dr. Kurt C. Frisch, Detroit, Michigan
Owner—Technomic Publishing Co., Inc.

Stockholders over 1%: None
Bondholders or Mortgages: None

| Circulation: | Average 12 mos. | Sept. 30th |
|---|---|---|
| Total Copies printed | 1,000 | 1,000 |
| Paid Circulation | | |
| Mail & Home Delivery | 504 | 504 |
| Stores & Dealers | 160 | 160 |
| Free Copies | 20 | 20 |
| Total Distribution | 684 | 684 |

I certify that the statements made by me above are correct and complete.
